

STRATEGY OVERVIEW

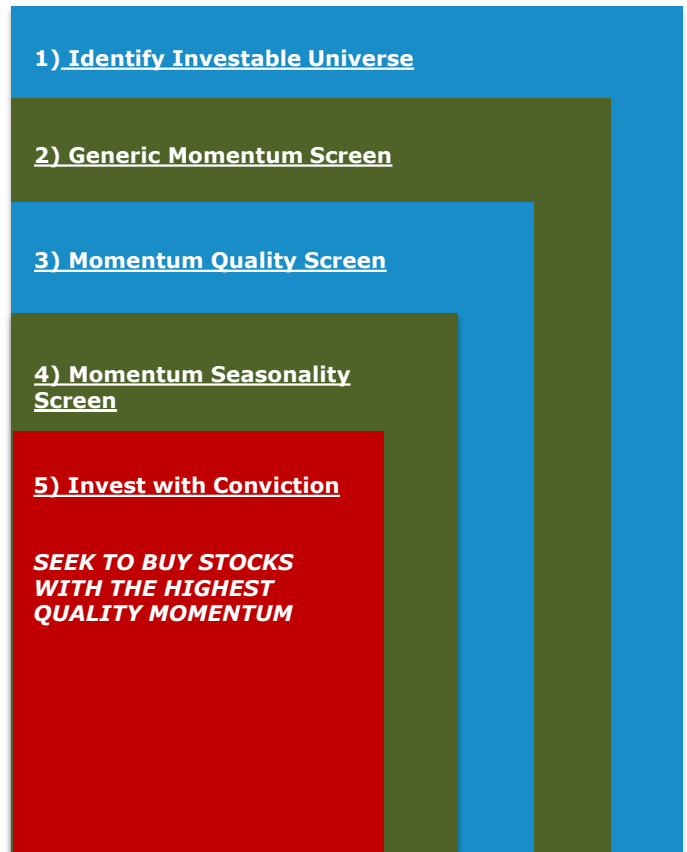

The Index seeks to invest in international stocks with the highest quality momentum*.

INDEX 5-STEP INVESTMENT PROCESS

IMOM is a self-indexing fund that seeks to track the total return performance, before fees and expenses, of the Alpha Architect International Quantitative Momentum Index (the "Index").

The process consists of 5 sequential steps:

- 1. Identify Investable Universe:** The Index universe generally consists of mid to large capitalization international exchange traded stocks.
- 2. Generic Momentum Screen:** The Index screens stocks on their past twelve-month returns, ignoring the previous month.¹
- 3. Momentum Quality Screen:** The Index screens high momentum stocks on the "quality" of their momentum—the Index focuses on momentum stocks with a relatively high proportion of positive daily return movements.²
- 4. Momentum Seasonality Screen:** The Index take advantage of seasonal aspects applicable to momentum investing—this step determines the timing of the rebalance.
- 5. Invest:** The Index seeks to invest in stocks with the highest quality momentum.

WHY INVEST IN IMOM?

Momentum Philosophy– The Index follows a classic momentum investment approach, which means that the Index focuses on stocks that have strong relative past performance.

Systematic – The Index stock selection algorithm is fully automated, which has the potential benefit of minimizing human cognitive bias in the investment process.

Behavioral Finance – The Index is built to exploit systematic mispricing caused by investor behavioral bias and to provide access to a highly focused momentum factor risk premium.

Momentum Factor Focus – Index-based access to a specific momentum factor which has historically driven a significant part of companies’ risk and return.³ The Index seeks to deliver a focused exposure that has the potential to strongly deviate from broad-based passive indexes. The stock selection process identifies a portfolio that generally holds 50 stocks. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund.

ALPHA ARCHITECT INTERNATIONAL QUANTITATIVE MOMENTUM ETF

Performance* (As of Dec 31, 2018)

	3 Month	1 Year	3 Year	Since Inception
NAV	-17.60%	-22.15%	-2.18%	-1.52%
Market Value	-18.36%	-23.07%	-2.16%	-1.66%

Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Market price returns are based upon the closing composite market price and do not represent the returns you would receive if you traded shares at other times. For performance data current to the most recent month end, please call 215.882.9983 or visit www.alphaarchitect.com/funds.

*Expense ratio of 0.79% for December 31, 2018 returns is as of the prospectus dated January 31, 2018.

Top Ten Holdings% (As of Dec 31, 2018)

AMER SPORTS CORP	2.68%
KEIO CORPORATION	2.50%
TOHO GAS CO	2.49%
GN STORE NORD	2.49%
WORKMAN CO LTD	2.48%

COLOPLAST	2.41%
CAPCOM CO LTD	2.40%
PEARSON	2.33%

Fund holdings are subject to change at any time and are not recommendations to buy or sell any security. Current and future holdings are subject to risk.

About Alpha Architect

The Alpha Architect mission is to empower investors through education in order to develop sustainable investors. We are a research-intensive asset management firm with a focus on concentrated factor exposures. Our core beliefs are 1) Transparency 2) Evidence-Based Investing, 3) Systematic Decision Making, and 4) Win-Win client relationships.

We currently offer our services via Exchange-Traded Funds (ETFs), Separately Managed Accounts (SMAs), and pooled vehicles.

The foundation for our approach is as follows:

1. We identify unique stock characteristics that are associated with systematic mispricing.
2. We design portfolios that seek to deliver concentrated exposure to these unique characteristics.

The firm is based in the suburbs of Philadelphia, PA. For more information visit www.AlphaArchitect.com.

About the Index Manager CEO

After serving as a Captain in the United States Marine Corps, Dr. Gray earned a PhD, and worked as a finance professor at Drexel University. Dr. Gray's interest in bridging the research gap between academia and industry led him to found Alpha Architect, an asset management that delivers affordable active exposures for tax-sensitive investors. Dr. Gray has published four books and a number of academic articles. Wes is a regular contributor to multiple industry outlets, to include the following: Wall Street Journal, Forbes, ETF.com, and the CFA Institute. Dr. Gray earned an MBA and a PhD in finance from the University of Chicago and graduated magna cum laude with a BS from The Wharton School of the University of Pennsylvania. Wes currently resides in the suburbs of Philadelphia with his wife and 3 kids.

**IMPORTANT DISCLOSURES****Past performance does not guarantee future results.**

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The statutory and summary prospectus contains this and other important information about the investment company, and it may be obtained once available by calling 215-882-9983 or visiting www.AlphaArchitect.com/funds. Read it carefully before investing.

Investments involve risk. Principal loss is possible. Redemptions are limited and often commissions are charged on each trade. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Fund's Shares and greater risk of loss. Unlike mutual funds, ETFs may trade at a premium or discount to their net asset value. Investments in mid cap companies involve limited liquidity and greater volatility than larger companies.

Value investing is subject to the risk that intrinsic values of investments may not be recognized by the broad market or that their prices may decline. Investments utilizing quantitative methods may perform differently than the market as a result of characteristics and data used and changes in trends. Momentum investing is subject to the risk that past performance does not predict the future performance of investments. Investments in foreign securities involve political, economic and currency risks, greater volatility and differences in accounting methods. The Funds are not actively managed. Maintaining investments regardless of market conditions or the performance of individual investment could cause the fund's return to be lower than if the fund employed an active strategy. The performance of the Fund and its Index may differ due to tracking error.

The Securities and Exchange commission (SEC) does not approve or disapprove of any investment.
