

Freedom 100 Emerging Markets ETF

Ticker Symbol: FRDM

Prospectus

May 17, 2019

Listed on Cboe BZX Exchange, Inc.

Beginning on January 1, 2021, as permitted by regulations adopted by the SEC, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the Fund's reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to elect to receive shareholder reports and other Fund communications electronically.

You may elect to receive all future Fund reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

These securities have not been approved or disapproved by the Securities and Exchange Commission nor has the Securities and Exchange Commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

FREEDOM 100 EMERGING MARKETS ETF

Fund Summary

INVESTMENT OBJECTIVE

The Freedom 100 Emerging Markets ETF (the “Fund”) seeks to track the total return performance, before fees and expenses, of the Life + Liberty Freedom 100 Emerging Markets Index (the “Index”).

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund (“Shares”). The fees and expenses are expressed as a percentage of the Fund’s average daily net assets. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table.

ANNUAL FUND OPERATING EXPENSES (EXPENSES THAT YOU PAY EACH YEAR AS A PERCENTAGE OF THE VALUE OF YOUR INVESTMENT)

Management Fee	0.49%
Distribution and/or Service (12b-1) Fees	None
Other Expenses ¹	0.00%
Total Annual Fund Operating Expenses	0.49%

¹ Other Expenses are estimated for the current fiscal year.

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year:	Three Years:
\$50	\$157

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. At the date of this Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

PRINCIPAL INVESTMENT STRATEGIES

The Fund uses a “passive management” (or indexing) approach to seek to track the total return performance, before fees and expenses, of the Index. The Life + Liberty Freedom 100 Emerging Markets Index is a freedom-weighted emerging markets equity index.

Life + Liberty Freedom 100 Emerging Markets Index

The Index is designed to track the performance of a portfolio of approximately 100 equity securities listed in emerging market countries. Thereafter, country inclusion and weights are determined based on quantified data covering 79 personal and economic freedom factors. Factors are categorized into three main types of freedoms: the rights to life (such as absence of terrorism, human trafficking, torture, and political detentions), liberty (such as rule of law, due process, freedom of the press, freedom of religion, freedom of assembly), and property (such as marginal tax rates, access to international trade, business regulations, established monetary and fiscal institutions, and size of government). A quantitative model is used to weigh the countries based on human and economic freedom metrics as described below. Securities within countries are then selected based upon market capitalization (“market cap”) and liquidity metrics (90-day average daily volume of shares traded on a public exchange or “Market Liquidity”) and are subsequently market cap-weighted. The Index excludes state owned enterprises (“SOE”) from the security selection process. The Index was developed in 2017 by Life + Liberty Investments, LLC, the Fund’s index provider (the “Index Provider”).

The Index Universe	Construction of the Index begins with the universe of common and preferred stocks (or their depositary receipts) of emerging markets countries. As of February 14, 2019 emerging market countries include: Argentina, Brazil, Chile, China, Colombia, Czech Republic, Greece, Egypt, Hungary, India, Indonesia, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Qatar, Russia, Saudi Arabia, South Africa, South Korea, Taiwan, Thailand, Turkey, and United Arab Emirates (collectively, the “Emerging Markets”).
Market Capitalization Screens	The Index Provider determines the emerging markets eligible to be included in the Index at the time of each annual reconstitution of the Index based primarily on the market capitalization of each emerging market relative to the aggregate world market capitalization. Emerging Markets with a market capitalization of at least 0.15% of current global market capitalization plus an average market capitalization of at least 0.15% for the prior three years are included in the Index. After inclusion, an Emerging Market is retained in the Index so long as its Freedom Score (defined below) does not fall below a disqualifying level.
Country Selection and Weighting	The Index methodology continues its rules-based process by further screening each Emerging Market by its composite freedom score (“Freedom Score”). This score determines each Emerging Market’s inclusion and weight in the index. The Freedom Score is derived using a combination of 79 quantified personal and economic freedom factors compiled by Fraser Institute, a leading independent global think-tank. The Freedom Score is translated by the Index Provider into a relative weight for each Emerging Market which can be positive or negative. Emerging Market countries with positive weights are included in the Index. Based on the Index rules, the higher a given Emerging Market’s Freedom Score, the higher its relative weighting in the Index. The lower a given Emerging Market’s Freedom Score, the lower its relative weight in the Index. As of February 14, 2019, the following ten Emerging Markets were included in the Index: Taiwan, South Korea, Chile, Poland, South Africa, Philippines, Mexico, Indonesia, Thailand and India (each, an “Index Market”). At the conclusion of this step, the country weights are established.
Component Selection and Weighting	The index securities’ universe includes all companies, other than SOEs, that are domiciled in each of the selected Index Market countries. The top ten securities within each Index Market are identified, based on market capitalization and Market Liquidity. All securities must meet a minimum trading volume on a public exchange and market capitalization requirement, otherwise they will be excluded. Either local shares or depositary receipts can be used in the Index depending on which is more liquid and whether the country of domicile has restrictive foreign ownership requirements. The Index components are then individually weighted within each country based on their market capitalization. SOEs are defined by the Index Provider as companies with 20% or more government ownership and are excluded from the Index. The

Index may include small-, mid-, and large-capitalization companies; however, the rules of the Index will naturally favor large-capitalization companies with Market Liquidity. At the conclusion of this step, the individual security weights within each country will be established.

Portfolio
Construction

The Index is assessed annually in January of each year at which time the Index is reconstituted and rebalanced by the Index Provider. Component changes are made after the market close on the third Friday of January and become effective at the market open on the next trading day.

The Fund's Investment Strategy

Under normal circumstances, at least 80% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index or in depositary receipts representing such component securities. The Adviser expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a "replication" strategy to seek to achieve its investment objective, meaning the Fund will invest in all of the component securities of the Index in the same approximate proportions as in the Index, but may, when the Adviser believes it is in the best interests of the Fund, use a "representative sampling" strategy, meaning the Fund may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole.

The Fund will not concentrate its investments in a particular industry or group of industries, as that term is used in the Investment Company Act of 1940, as amended (the "Investment Company Act"), except that the Fund will invest more than 25% of its total assets in securities of the same industry to approximately the same extent that the Index concentrates in the securities of a particular industry or group of industries.

The Fund may also invest up to 20% of its assets in cash and cash equivalents, other investment companies, as well as securities and other instruments not included in the Index but which the Adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions and deletions).

Under normal circumstances, the Fund will invest at least 80% of its net assets, plus borrowings for investment purposes, in securities economically tied to emerging market countries. The Fund's 80% policy is non-fundamental and can be changed without shareholder approval. However, Fund shareholders would be given at least 60 days' notice prior to any such change.

For purposes of the Fund's 80% policy, the securities of a company are considered to be economically tied to an emerging market country if one or more of the following attributes are tied to an emerging markets country: stock exchange listing; where it is registered, organized or incorporated; where its headquarters are located; where it derives at least 50% of its revenues or profits from goods produced or sold, investments made, or services performed; or where at least 50% of its assets are located.

The Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund.

PRINCIPAL RISKS

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. More complete risk descriptions are set forth below under the heading "*Additional Information About the Fund's Risks*".

Foreign Investment Risk. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Investments in or exposures to foreign securities are subject to special risks, including risks associated with foreign securities generally, including differences in information available about issuers of securities and investor protection standards applicable in other jurisdictions; capital controls risks, including the risk of a foreign jurisdiction imposing restrictions on the ability to repatriate or transfer currency or other assets; currency risks; political, diplomatic and economic risks; regulatory risks; and foreign market and trading risks, including the costs of trading and risks of settlement in foreign jurisdictions.

Concentration Risk. The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, to the extent that the Fund's investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector, or asset class.

Depository Receipts Risk. The risks of investments in depository receipts, including American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), and Global Depositary Receipts ("GDRs"), are substantially similar to Foreign Investment Risk. In addition, depository receipts may not track the price of the underlying foreign securities, and their value may change materially at times when the U.S. markets are not open for trading.

Emerging Markets Risk. The Fund may invest in companies organized in emerging market nations. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Freedom Investment Strategy Risk. The Fund's Freedom investment strategy limits the types and number of investment opportunities available to the Fund and, as a result, the Fund may underperform other emerging markets funds that do not have a freedom focus. In addition, the Index Provider may be unsuccessful in creating an index composed only of companies in countries that benefit from significant personal and economic freedoms.

Freedom Score Risk. The Index Provider relies upon the Fraser Institute, a global, independent think-tank partnership, to obtain the Freedom Score used in the Index. The Freedom Score is derived using quantified data derived from government organizations, non-governmental organizations ("NGO" or collectively "NGOs"), private sector actors, and other entities. This data is consolidated, analyzed, and disseminated by the Fraser Institute. Changes to the Freedom Score methodology or its data sources by the Fraser Institute are not controlled by the Index Provider, who relies exclusively upon the Freedom Score output for use in the Index. Should the Fraser Institute cease to provide the Freedom Score entirely, materially delay its reporting of the Freedom Score, or materially modify the calculation of the Freedom Score, the Index Provider will use its own patent-pending algorithm to produce the Freedom Score output internally using similar inputs and variables.

Quantitative Security Selection Risk. Data for some companies in which the Fund invests or upon which the Fund calculates its allocations may be less available and/or less current than data for companies in other markets. The Index uses a quantitative model to generate investment decisions and its processes and stock selection could be adversely affected if it relies on erroneous or outdated data. In addition, securities selected using the quantitative model could perform differently from the financial markets as a whole as a result of the characteristics used in the analysis, the weight placed on each characteristic and changes in the characteristic's historical trends.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

Passive Investment Risk. The Fund is not actively managed and the Adviser will not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index, sold in connection with a rebalancing of the Index as addressed in the Index methodology, or sold to comply with the Fund's investment limitations (for example, to maintain the Fund's tax status). Maintaining investments regardless of market conditions or the performance of individual investments could cause the Fund's return to be lower than if the Fund employed an active strategy.

Tracking Error Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

Investment Risk. When you sell your Shares of the Fund, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

Premium-Discount Risk. The Shares may trade above or below their net asset value ("NAV"). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on Cboe BZX Exchange, Inc. ("Exchange") or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares.

Secondary Market Trading Risk. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.

Trading Risk. Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of the Fund's Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be significantly less liquid than the Fund's Shares, potentially causing the market price of the Fund's Shares to deviate from its NAV.

Non-Diversification Risk. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Fund's Shares and greater risk of loss.

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step

forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Less Experienced Index Provider Risk. The Index Provider is new and less experienced, and therefore there is a greater risk that the Index Provider may fail to compile the Index accurately.

Market Capitalization Risk. To the extent the Fund emphasizes large-, mid- or small-capitalization stocks, it will assume the associated risks. At any given time, any of these market capitalizations may be out of favor with investors.

- **Large-Capitalization Investing.** The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- **Mid-Capitalization Investing.** The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole.
- **Small-Capitalization Investing.** The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.

PERFORMANCE

The Fund has not commenced operations as of the date of this Prospectus. Performance information will be available in the Prospectus after the Fund has been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund's average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at www.alphaarchitect.com/funds.

INVESTMENT ADVISER

Empowered Funds, LLC serves as the investment adviser of the Fund.

PORTFOLIO MANAGER

Mr. Tao Wang is the portfolio manager for the Fund and has managed the Fund since its inception in 2019.

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares on a continuous basis only in large blocks of Shares, typically 50,000 Shares, called "Creation Units," and only APs (typically, broker-dealers) may purchase or redeem Creation Units. Creation Units generally are issued and redeemed 'in-kind' for securities and partially in cash, but may also be issued and redeemed only for cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Once created, individual Shares generally trade in the secondary market at market

prices that change throughout the day. Market prices of Shares may be greater or less than their NAV. Except when aggregated in Creation Units, the Fund's shares are not redeemable securities.

TAX INFORMATION

The Fund's distributions generally are taxable to you as ordinary income, capital gains, or some combination of both, unless your investment is in an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to federal income tax. You should consult your tax advisor about your specific tax situation.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

HOW IS THE FUND DIFFERENT FROM A MUTUAL FUND?

Redeemability. Mutual fund shares may be bought from, and redeemed with, the issuing fund for cash at NAV typically calculated once at the end of the business day. Shares of the Fund, by contrast, cannot be purchased from or redeemed with the Fund except by or through APs (typically, broker-dealers), and then principally for an in-kind basket of securities (and a limited cash amount) or cash amount. In addition, the Fund issues and redeems Shares on a continuous basis only in large blocks of Shares, typically 50,000 Shares, called "Creation Units."

Exchange Listing. Unlike mutual fund shares, Shares of the Fund will be listed for trading on the Exchange. Investors can purchase and sell Shares on the secondary market through a broker. Investors purchasing Shares in the secondary market through a brokerage account or with the assistance of a broker may be subject to brokerage commissions and charges. Secondary-market transactions do not occur at NAV, but at market prices that change throughout the day, based on the supply of, and demand for, Shares and on changes in the prices of the Fund's portfolio holdings. The market price of Shares may differ from the NAV of the Fund. The difference between market price of Shares and the NAV of the Fund is called a premium when the market price is above the reported NAV and called a discount when the market price is below the reported NAV, and the difference is expected to be small most of the time, though it may be significant, especially in times of extreme market volatility.

Tax Treatment. Shares have been designed to be tax-efficient. Specifically, their in-kind creation and redemption feature has been designed to protect Fund shareholders from adverse tax consequences applicable to registered investment companies as a result of cash transactions in the registered investment company's shares, including cash redemptions. Nevertheless, to the extent redemptions from the Fund are paid in cash, the Fund may realize capital gains or losses, including in some cases short-term capital gains, upon the sale of portfolio securities to generate the cash to satisfy the redemption.

Transparency. The Fund's portfolio holdings are disclosed on its website daily after the close of trading on the Exchange and prior to the opening of trading on the Exchange the following day. A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

Premium/Discount Information. Information about the premiums and discounts at which the Fund's Shares have traded will be available at www.alphaarchitect.com/funds.

ADDITIONAL INFORMATION ABOUT THE INDEX

The Index Provider is not affiliated with the Fund, the Adviser, the Fund's distributor, the Index Calculation Agent or any of their respective affiliates. The Index Provider has licensed the use of the Index to the Adviser, which has sub-licensed it to the Trust on behalf of the Fund. None of the Index Provider or any of its respective affiliates make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to the Fund, nor are they involved in the calculation of the Index.

The Index Provider has retained an unaffiliated third party, Solactive, AG, to calculate the Index. The Calculation Agent, using the applicable rules-based methodology, will calculate, maintain and disseminate the Index on a daily basis.

The Index Provider will monitor the results produced by the Calculation Agent to help ensure that the Index is being calculated in accordance with the applicable rules-based methodology.

Freedom 100 Emerging Markets ETF (Ticker: FRDM) is not offered or sold by Life + Liberty Indexes or any of its affiliates, licensors or contractors (the "LL Parties") nor do any of the LL Parties offer any express or implicit guarantee, warranty or assurance either with regard to the results of using the Life + Liberty Freedom 100 Emerging Markets Index (the "Index") or the Index Price at any time or in any other respect. The Index is calculated and published by the LL Parties. Life + Liberty Indexes has entered into an agreement with FRDM's Adviser to sponsor the Fund. The LL Parties use commercially reasonable efforts to ensure that the Index is calculated correctly. Neither publication of the Index by the LL Parties nor the licensing of the Index or Index trademark(s) for the purpose of use in connection with the Freedom 100 Emerging Markets ETF (Ticker: FRDM) constitutes a recommendation by any of the LL Parties to invest in the Freedom 100 Emerging Markets ETF (Ticker: FRDM). "Freedom 100" and "Life + Liberty Indexes" are trademarks of Life + Liberty Investments, LLC.

ADDITIONAL INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE AND STRATEGIES

The Fund's investment objective is a non-fundamental investment policy and may be changed without a vote of shareholders upon prior written notice to shareholders.

Under normal circumstances, at least 80% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index and depositary receipts representing such component securities.

ADDITIONAL INFORMATION ABOUT THE FUND'S RISKS

Below is additional information about the risks of investing in the Fund, including the principal risks identified under "Principal Risks" in the Fund Summary.

Foreign Investment Risk. The Fund may invest in foreign securities, including non-U.S. dollar-denominated securities traded outside of the United States and U.S. dollar-denominated securities of foreign issuers traded in the United States. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Investments in foreign securities, including investments in ADRs, EDRs, and GDRs, are subject to special risks, including the following:

Foreign Securities Risk. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Changes to the financial condition or credit rating of foreign issuers may also adversely affect the value of the Fund's

securities. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when the Fund does not price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's Shares. Conversely, Shares may trade on days when foreign exchanges are closed. Investment in foreign securities may involve higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

Capital Controls Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to government intervention and the imposition of "capital controls" or expropriation or nationalization of assets. The possible establishment of exchange controls or freezes on the convertibility of currency, or the adoption of other governmental restrictions, might adversely affect an investment in foreign securities. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets within or out of a jurisdiction. Levies may be placed on profits repatriated by foreign entities (such as the Fund). Capital controls may impact the ability of the Fund to buy, sell or otherwise transfer securities or currency, may adversely affect the trading market and price for Shares of the Fund, and may cause the Fund to decline in value.

Depository Receipt Risk. The Fund's investments in foreign companies may be in the form of depository receipts, including ADRs, EDRs, and GDRs. ADRs, EDRs, and GDRs are generally subject to the risks of investing directly in foreign securities and, in some cases, there may be less information available about the underlying issuers than would be the case with a direct investment in the foreign issuer. ADRs are U.S. dollar-denominated receipts representing shares of foreign-based corporations. GDRs are similar to ADRs but are shares of foreign-based corporations generally issued by international banks in one or more markets around the world. Investment in ADRs and GDRs may be more or less liquid than the underlying shares in their primary trading market and GDRs may be more volatile. Depository receipts may be "sponsored" or "unsponsored" and may be unregistered and unlisted. Sponsored depository receipts are established jointly by a depository and the underlying issuer, whereas unsponsored depository receipts may be established by a depository without participation by the underlying issuer. Holders of an unsponsored depository receipt generally bear all the costs associated with establishing the unsponsored depository receipt. In addition, the issuers of the securities underlying unsponsored depository receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depository receipts. In general, ADRs must be sponsored, but the Fund may invest in unsponsored ADRs under certain limited circumstances. It is expected that not more than 10% of the net assets of the Fund will be invested in unsponsored ADRs. The Fund's investments may also include ADRs and GDRs that are not purchased in the public markets and are restricted securities that can be offered and sold only to "qualified institutional buyers" under Rule 144A of the Securities Act of 1933, as amended (the "Securities Act"). The Adviser will determine the liquidity of these investments pursuant to guidelines established by the Board. If a particular investment in such ADRs or GDRs is deemed illiquid, that investment will be included within the Fund's limitation on investment in illiquid securities. Moreover, if adverse market conditions were to develop during the period between the Fund's decision to sell these types of ADRs or GDRs and the point at which the Fund is permitted or able to sell such security, the Fund might obtain a price less favorable than the price that prevailed when it decided to sell.

Currency Risk. The Fund's NAV is determined on the basis of U.S. dollars; therefore, the Fund may lose value if the local currency of a foreign market depreciates against the U.S. dollar, even if the local currency value of the Fund's holdings goes up. Currency exchange rates may fluctuate significantly over short periods of time. Currency exchange rates also can be affected unpredictably by intervention; by failure to intervene by U.S. or foreign governments or central banks; or by currency controls or political developments in the U.S. or abroad. Changes in foreign currency exchange rates may affect the NAV of the Fund and the price of the

Fund's Shares. Devaluation of a currency by a country's government or banking authority would have a significant impact on the value of any investments denominated in that currency.

Political and Economic Risk. The Fund is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events (civil unrest, national elections, changes in political conditions and foreign relations, imposition of exchange controls and repatriation restrictions), social and economic events (labor strikes, rising inflation) and natural disasters occurring in a foreign country could cause the Fund's investments to experience gains or losses. The Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.

Foreign Market and Trading Risk. The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. The procedures and rules governing foreign transactions and custody (holding of the Fund's assets) also may involve delays in payment, delivery or recovery of money or investments. These factors could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing Fund assets to be uninvested for some period of time.

Concentration Risk. The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, to the extent that the Fund's investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector, or asset class.

Depository Receipts Risk. The risks of investments in depository receipts, including American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), and Global Depositary Receipts ("GDRs"), are substantially similar to Foreign Investment Risk. In addition, depository receipts may not track the price of the underlying foreign securities, and their value may change materially at times when the U.S. markets are not open for trading.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments. For example, developing and emerging markets may be subject to (i) greater market volatility, (ii) lower trading volume and liquidity, (iii) greater social, political and economic uncertainty, (iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) lower disclosure, corporate governance, auditing and financial reporting standards, (vi) fewer protections of property rights, (vii) restrictions on the transfer of securities or currency, and (viii) settlement and trading practices that differ from those in U.S. markets. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Shares and cause the Fund to decline in value.

Quantitative Security Selection Risk. Data for some issuers may be less available and/or less current than data for issuers in other markets. The Index uses a quantitative model, and its processes could be adversely affected if erroneous or outdated data is utilized. In addition, securities selected using a quantitative model could perform differently from the financial markets as a whole as a result of the characteristics used in the analysis, the weight placed on each characteristic and changes in the characteristic's historical trends. The factors used in such analyses may not be predictive of a security's value and its effectiveness can change over time. These changes may not be reflected in the quantitative model.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and underperformance in

comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Recent turbulence in financial markets and reduced liquidity in credit and fixed income markets may negatively affect many issuers worldwide, which may have an adverse effect on the Fund.

Passive Investment Risk. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its respective Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index. The returns from the types of securities in which the Fund invest may underperform returns from the various general securities markets or different asset classes. This may cause the Fund to underperform other investment vehicles that invest in different asset classes. Different types of securities (for example, large-, mid- and small-capitalization stocks) tend to go through cycles of doing better – or worse – than the general securities markets. In the past, these periods have lasted for as long as several years.

Tracking Error Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by an Index. In addition, the Fund may not be fully invested in the securities of its Index at all times or may hold securities not included in the Index. As a result of legal restrictions or limitations that apply to the Fund but not to the Index, the Fund may have less relative short exposure than the Index during periods in between the Index's monthly hedging reconstitutions. Such differences in short exposure may cause the performance of the Fund and its Index to differ from each other.

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Premium-Discount Risk. The Shares may trade above or below their NAV. The NAV of the Fund will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares, however, will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on the Exchange and other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading in Shares. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities held by the Fund. However, given that Shares can be purchased and redeemed in large blocks of Shares, called Creation Units (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), and the Fund's portfolio holdings are fully disclosed on a daily basis, the Adviser believes that large discounts or premiums to the NAV of Shares should not be sustained, but that may not be the case.

Secondary Market Trading Risk. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if the Fund's Shares have more trading volume and market liquidity and higher if the Fund's Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads.

Trading Risk. Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. Further, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Non-Diversification Risk. The Fund may be more sensitive to a single economic, business, political, regulatory or other occurrence than a more diversified portfolio might be, which may result in greater fluctuation in the value of the Fund’s shares and to a greater risk of loss.

APs, Market Makers and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Less Experienced Index Provider Risk. The Index Provider is new and less experienced, and therefore there is a greater risk that the Index Provider may fail to compile the Index accurately.

Market Capitalization Risk. To the extent the Fund emphasizes large-, mid- or small-capitalization stocks, it will assume the associated risks. At any given time, any of these market capitalizations may be out of favor with investors.

- **Large-Capitalization Investing.** The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- **Mid-Capitalization Investing.** The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole.
- **Small-Capitalization Investing.** The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.

FUND MANAGEMENT

Empowered Funds, LLC acts as the Fund's investment adviser. The Adviser is located at 213 Foxcroft Road, Broomall, PA 19008 and is a wholly owned and controlled subsidiary of Empirical Finance, LLC d/b/a Alpha Architect ("Alpha Architect"). The Adviser is registered with the Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940 and provides investment advisory services solely to the Fund and the following ETFs: Alpha Architect U.S. Quantitative Value ETF, Alpha Architect International Quantitative Value ETF, Alpha Architect U.S. Quantitative Momentum ETF, Alpha Architect International Quantitative Momentum ETF and Alpha Architect Value Momentum Trend ETF. The Adviser was founded in October 2013.

The Adviser is responsible for overseeing the management and business affairs of the Fund and has discretion to purchase and sell securities in accordance with the Fund's objectives, policies and restrictions. The Adviser continuously reviews, supervises and administers the Fund's investment programs pursuant to the terms of investment advisory agreement (the "Advisory Agreement") between the Trust and the Adviser. Because the Fund has not commenced operations prior to the date of this Prospectus, the Adviser did not receive a fee during the last fiscal year. The Adviser is entitled to receive the following Advisory Fee: 0.49% (annual rate as a percentage of average daily net assets). The Adviser bears all of its own costs associated with providing these advisory services and all expenses of the Fund, except for the fee payment under the Advisory Agreement, payments under the Fund's Rule 12b-1 Distribution and Service Plan (the "Plan"), brokerage expenses, acquired fund fees and expenses, taxes, interest (including borrowing costs), litigation expense and other non-routine or extraordinary expenses.

The Advisory Agreement for the Fund provides that it may be terminated at any time, without the payment of any penalty, by the Board or, with respect to the Fund, by a majority of the outstanding shares of the Fund, on 60 days' written notice to the Adviser, and by the Adviser upon 60 days' written notice, and that it shall be automatically terminated if it is assigned.

PORTFOLIO MANAGER

Mr. Tao Wang is the portfolio manager responsible for the day-to-day management of the Fund.

Tao Wang has been portfolio manager of the Fund since its inception. Mr. Wang has been a Managing Member of the Adviser and Alpha Architect since September 2013, where he heads the trading department and assists in quantitative research. His recent research focuses on long/short commodity strategies, volatility index arbitrage and tactical asset allocation. Mr. Wang has a M.S. in Finance from Drexel University, and graduated with a B.A. in Economic Journalism and B.L. in International Business Law from Shanghai University of Finance & Economics. He is also a CFA Charterholder. His prior working experience includes time as a Summer Analyst Intern at CITIC Securities from June 2011 to September 2011 and as a Part-time Assistant at Bain Capital from March to August 2010. Mr. Wang holds the Series 65 and 3 licenses.

The Fund's SAI provides additional information about the portfolio manager, including other accounts he manages, his ownership in the Fund and his compensation.

APPROVAL OF ADVISORY AGREEMENT

A discussion regarding the basis for the Board's approval of the Advisory Agreement with respect to the Fund will be made available in the Fund's annual report for the reporting period ending September 30, 2019.

OTHER SERVICE PROVIDERS

Quasar Distributors, LLC ("Distributor") serves as the distributor of Creation Units (defined below) for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, is the administrator, fund accountant and transfer agent for the Fund.

U.S. Bank National Association is the custodian for the Fund.

Pellegrino, LLC, 303 West Lancaster Avenue, Suite 302, Wayne, PA 19087, serves as legal counsel to the Fund.

Spicer Jeffries LLP serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

THE EXCHANGE

Shares of the Fund are not sponsored, endorsed or promoted by the Exchange. The Exchange is not responsible for, nor has it participated, in the determination of the timing of, prices of, or quantities of Shares of the Fund to be issued, nor in the determination or calculation of the equation by which the Shares are redeemable. The Exchange has no obligation or liability to owners of the Shares of the Fund in connection with the administration, marketing or trading of the Shares of the Fund. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

BUYING AND SELLING FUND SHARES

Shares will be issued or redeemed by the Fund at NAV per Share only in Creation Units of 50,000 Shares. Creation Units generally are issued and redeemed 'in-kind' for securities and partially for cash, but may also be issued and redeemed only for cash.

Shares will trade on the secondary market, however, which is where most retail investors will buy and sell Shares. It is expected that only a limited number of institutional investors, called Authorized Participants or "APs," will purchase and redeem Shares directly from the Fund. APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

Except when aggregated in Creation Units, Shares are not redeemable with the Fund.

BUYING AND SELLING SHARES ON THE SECONDARY MARKET

Most investors will buy and sell Shares in secondary market transactions through brokers and, therefore, must have a brokerage account to buy and sell Shares. Shares can be bought or sold through your broker throughout the trading day like shares of any publicly traded issuer. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered prices in the secondary market for Shares. The price at which you buy or sell Shares (*i.e.*, the market price) may be more or less than the NAV of the Shares. Unless imposed by your broker, there is no minimum dollar amount you must invest in the Fund and no minimum number of Shares you must buy.

Shares of the Fund will be listed on the Exchange under the following symbol:

Fund

Freedom 100 Emerging Markets ETF

Trading Symbol

FRDM

The Exchange is generally open Monday through Friday and is closed for weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

For information about buying and selling Shares on the Exchange or in the secondary markets, please contact your broker or dealer.

Book Entry. Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”), or its nominee, will be the registered owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely on the procedures of DTC and its participants. These procedures are the same as those that apply to any stocks that you hold in book entry or “street name” through your brokerage account. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of Shares, and tax information. Your broker also will be responsible for distributing income dividends and capital gain distributions and for ensuring that you receive shareholder reports and other communications from the Fund.

Share Trading Prices. The trading prices of the Fund’s Shares may differ from the Fund’s daily NAV and can be affected by market forces of supply and demand for the Fund’s Shares, the prices of the Fund’s portfolio securities, economic conditions and other factors.

The Exchange through the facilities of the Consolidated Tape Association or another market information provider intends to disseminate the approximate value of the Fund’s portfolio every fifteen seconds. This approximate value should not be viewed as a “real-time” update of the NAV of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day. The quotations for certain investments may not be updated during U.S. trading hours if such holdings do not trade in the U.S., except such quotations may be updated to reflect currency fluctuations. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate values and makes no warranty as to the accuracy of these values.

Continuous Offering. The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a “distribution,” as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirements and liability provisions of the Securities Act. For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act. As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

ACTIVE INVESTORS AND MARKET TIMING

The Board has evaluated the risks of market timing activities by the Fund's shareholders. The Board noted that the Fund's Shares can only be purchased and redeemed directly from the Fund in Creation Units by APs and that the vast majority of trading in the Fund's Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), the Board noted that those trades do not cause the harmful effects (as previously noted) that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective, although in certain circumstances (e.g., in conjunction with a rebalance of the Fund's Index), such trades may benefit Fund shareholders by increasing the tax efficiency of the Fund. The Board also noted that direct trading by APs is critical to ensuring that the Fund's Shares trade at or close to NAV. The Fund also employs fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund may impose transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Fund in effecting trades. Given this structure, the Board determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund's Shares.

DISTRIBUTION AND SERVICE PLAN

The Fund has adopted the Plan pursuant to Rule 12b-1 under the Investment Company Act. Under the Plan, the Fund may be authorized to pay distribution fees of up to 0.25% of its average daily net assets each year to the Distributor and other firms that provide distribution and shareholder services ("Service Providers"). As of the date of this Prospectus, the maximum amount payable under the Plan is set at 0% until further action by the Board. In the event 12b-1 fees are charged, over time they would increase the cost of an investment in the Fund because they would be paid on an ongoing basis.

NET ASSET VALUE

The NAV of Shares is calculated each business day as of the close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m., Eastern time.

The Fund calculates its NAV per Share by:

- Taking the current market value of its total assets,
- Subtracting any liabilities, and
- Dividing that amount by the total number of Shares owned by shareholders.

If you buy or sell Shares on the secondary market, you will pay or receive the market price, which may be higher or lower than NAV. Your transaction will be priced at NAV only if you purchase or redeem your Shares in Creation Units.

Because securities listed on foreign exchanges may trade on weekends or other days when the Fund does not price its Shares, the NAV of the Fund, to the extent it may hold foreign securities, may change on days when shareholders will not be able to purchase or sell Shares.

Equity securities that are traded on a national securities exchange, except those listed on the NASDAQ Global Market® ("NASDAQ") are valued at the last reported sale price on the exchange on which the security is principally traded. Securities traded on NASDAQ will be valued at the NASDAQ Official Closing Price ("NOCP"). If, on a particular day, an exchange-traded or NASDAQ security does not trade, then the most recent quoted bid for exchange traded or the mean between the most recent quoted bid and ask price for NASDAQ

securities will be used. Equity securities that are not traded on a listed exchange are generally valued at the last sale price in the over-the-counter market. If a nonexchange traded security does not trade on a particular day, then the mean between the last quoted closing bid and asked price will be used.

Prices denominated in foreign currencies are converted to U.S. dollar equivalents at the current exchange rate, which approximates fair value.

Redeemable securities issued by open-end investment companies are valued at the investment company's applicable net asset value, with the exception of exchange-traded open-end investment companies which are priced as equity securities.

If a market price is not readily available or is deemed not to reflect market value, the Fund will determine the price of the security held by the Fund based on a determination of the security's fair value pursuant to policies and procedures approved by the Board. In addition, the Fund may use fair valuation to price securities that trade on a foreign exchange, if any, when a significant event has occurred after the foreign exchange closes but before the time at which the Fund's NAV is calculated. Foreign exchanges typically close before the time at which Share prices are calculated, and may be closed altogether on some days when the Fund is open. Such significant events affecting a foreign security, in the event the Fund holds foreign securities, may include, but are not limited to: corporate actions, earnings announcements, litigation or other events impacting a single issuer; governmental action that affects securities in one sector or country; natural disasters or armed conflicts affecting a country or region; or significant domestic or foreign market fluctuations. If the Fund holds foreign securities, it would use various criteria, including an evaluation of U.S. market moves after the close of foreign markets, in determining whether a foreign security's market price is readily available and reflective of market value and, if not, the fair value of the security.

To the extent the Fund has holdings of foreign or other securities that may trade infrequently, fair valuation may be used more frequently than for other funds. Fair valuation may have the effect of reducing stale pricing arbitrage opportunities presented by the pricing of Shares. However, when the Fund uses fair valuation to price securities, it may value those securities higher or lower than another fund would have priced the security. Also, the use of fair valuation may cause the Shares' NAV performance to diverge from the Shares' market price and from the performance of various benchmarks used to compare the Fund's performance because benchmarks generally do not use fair valuation techniques. Because of the judgment involved in fair valuation decisions, there can be no assurance that the value ascribed to a particular security is accurate.

The value of assets denominated in foreign currencies is converted into U.S. dollars using exchange rates deemed appropriate by the Fund.

FUND WEBSITE AND DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust maintains a website for the Fund at www.alphaarchitect.com/funds. Among other things, the website includes this Prospectus and the SAI, and will include the Fund's holdings, the Fund's last annual and semi-annual reports (when available), pricing information about Shares trading on the Exchange, daily NAV calculations and a historical comparison of the trading prices to NAV.

Each day the Fund is open for business, the Trust publicly disseminates the Fund's full portfolio holdings as of the close of the previous day through its website at www.alphaarchitect.com/funds. A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI.

INVESTMENTS BY OTHER INVESTMENT COMPANIES

For purposes of the Investment Company Act, Shares are issued by a registered investment company and purchases of such Shares by registered investment companies and companies relying on Section 3(c)(1) or 3(c)(7)

of the Investment Company Act are subject to the restrictions set forth in Section 12(d)(1) of the Investment Company Act, except as permitted by an exemptive order of the SEC.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Dividends and Distributions

Dividends and Distributions. The Fund intends to elect and qualify to be treated each year as a regulated investment company under the Internal Revenue Code. As a regulated investment company, the Fund generally pays no federal income tax on the income and gains it distributes to you. The Fund expects to declare and distribute all of its net investment income, if any, to shareholders as dividends quarterly. The Fund will distribute net realized capital gains, if any, at least annually. The Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Avoid “Buying a Dividend.” At the time you purchase Shares of the Fund, the Fund’s NAV may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Fund. For taxable investors, a subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. Buying Shares in the Fund just before it declares an income dividend or capital gains distribution is sometimes known as “buying a dividend.”

Taxes

Tax Considerations. The Fund expects, based on its investment objective and strategies, that its distributions, if any, will be taxable as ordinary income, capital gains, or some combination of both. This is true whether you reinvest your distributions in additional Shares or receive them in cash. For federal income tax purposes, Fund distributions of short-term capital gains are taxable to you as ordinary income. Fund distributions of long-term capital gains are taxable to you as long-term capital gains no matter how long you have owned your Shares. A portion of income dividends reported by the Fund may be qualified dividend income eligible for taxation by individual shareholders at long-term capital gain rates provided certain holding period requirements are met.

Taxes on Exchange-Listed Share Sales. A sale or exchange of Shares is a taxable event and, accordingly, a capital gain or loss may be recognized. Currently, any capital gain or loss realized upon a sale of Shares generally is treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Shares) of U.S. individuals, estates and trusts to the extent that such person’s “modified adjusted

gross income” (in the case of an individual) or “adjusted gross income” (in the case of an estate or trust) exceeds a threshold amount. This Medicare tax, if applicable, is reported by you on, and paid with, your federal income tax return.

Backup Withholding. By law, if you do not provide the Fund with your proper taxpayer identification number and certain required certifications, you may be subject to backup withholding on any distributions of income, capital gains or proceeds from the sale of your Shares. The Fund also must withhold if the Internal Revenue Service (“IRS”) instructs it to do so. When withholding is required, the amount will be 24% of any distributions or proceeds paid.

State and Local Taxes. Fund distributions and gains from the sale or exchange of your Shares generally are subject to state and local taxes.

Taxes on Purchase and Redemption of Creation Units. An AP who exchanges equity securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of purchase and the exchanger’s aggregate basis in the securities surrendered and the cash amount paid. A person who exchanges Creation Units for equity securities generally will recognize a gain or loss equal to the difference between the exchanger’s basis in the Creation Units and the aggregate market value of the securities received and the cash amount received. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether the wash sale rules apply and when a loss might be deductible.

Under current federal tax laws, any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If the Fund redeems Creation Units in cash, it may recognize more capital gains than it will if it redeems Creation Units in-kind.

Foreign Tax Credits. If the Fund qualifies to pass through to you the tax benefits from foreign taxes it pays on its investments, and elects to do so, then any foreign taxes it pays on these investments may be passed through to you as a foreign tax credit.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty rate and U.S. estate tax and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty benefits. An exemption from U.S. withholding tax is provided for capital gain dividends paid by the Fund from long-term capital gains, if any. The exemptions from U.S. withholding for interest-related dividends paid by the Fund from its qualified net interest income from U.S. sources and short-term capital gain dividends have expired for taxable years of the Fund that begin on or after January 1, 2014. It is unclear as of the date of this prospectus whether Congress will reinstate the exemptions for interest-related and short-term capital gain dividends or, if reinstated, whether such exemptions would have retroactive effect. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 28% if you fail to properly certify that you are not a U.S. person.

Other Reporting and Withholding Requirements. Under the Foreign Account Tax Compliance Act (FATCA), the Fund will be required to withhold a 30% tax on (a) income dividends paid by the Fund after June 30, 2014, and (b) certain capital gain distributions and the proceeds arising from the sale of Shares paid by the Fund after Dec. 31, 2016, to certain foreign entities, referred to as foreign financial institutions or non-financial foreign entities, that fail to comply (or be deemed compliant) with extensive new reporting and withholding requirements designed to inform the U.S. Department of the Treasury of US-owned foreign investment accounts. The Fund

may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

This discussion of “Dividends, Distributions and Taxes” is not intended or written to be used as tax advice. Because everyone’s tax situation is unique, you should consult your tax professional about federal, state, local or foreign tax consequences before making an investment in the Fund.

FINANCIAL HIGHLIGHTS

The Fund is newly organized and therefore has not yet had any operations as of the date of this Prospectus and does not have financial highlights to present at this time.

If you would like more information about the Fund and the Trust, the following documents are available free, upon request:

ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about the Fund will be in its annual and semi-annual reports to shareholders, when available. The annual report will explain the market conditions and investment strategies affecting the Fund's performance during the last fiscal year.

STATEMENT OF ADDITIONAL INFORMATION

The SAI dated May 17, 2019 which contains more details about the Fund, is incorporated by reference in its entirety into this Prospectus, which means that it is legally part of this Prospectus.

To receive a free copy of the latest annual or semi-annual report, when available, or the SAI, or to request additional information about the Fund, please contact us as follows:
